Professional Summary

Full Stack Developer specializing in backend architecture, REST APIs, PostgreSQL, JWT authentication, and secure web applications. Built and deployed HireFlow, a full-stack job board with role-based candidate and employer workflows, application management, and notifications.

Skills

• Languages: JavaScript, HTML, CSS
• Backend: Node.js, Express.js, REST APIs, PostgreSQL, JWT Authentication, bcrypt, Zod
• Frontend: React.js, Tailwind CSS, shadcn/ui, React Hook Form
• Database: PostgreSQL, MongoDB, Raw SQL, node-pg-migrate
• Security & Deployment: JWT refresh tokens, httpOnly cookies, rate limiting, input validation, Docker, Render, Vercel

Projects

HireFlow — Full-Stack Job Board | Node.js · Express.js · PostgreSQL · React.js · Docker · Render

Repo: github.com/rajidansari/hireflow-backend · Live: hireflow0.vercel.app

◦ Built and deployed a full-stack job board with 30+ REST API endpoints covering authentication, jobs, applications, candidate/employer profiles, and notifications.

◦ Implemented JWT authentication with OTP email verification, refresh token rotation using httpOnly cookies, and role-based access control for candidate and employer workflows.

◦ Developed PostgreSQL-backed job and application workflows with dynamic SQL filtering, pagination, sorting, status updates, and application lifecycle management.

◦ Built candidate CV upload and storage using Multer and Cloudinary, with validated API inputs using Zod and database migrations using node-pg-migrate.

◦ Implemented notification workflows for application status changes, including unread/read state, bulk actions, and notification deletion.

◦ Documented 30+ REST endpoints with Swagger/OpenAPI and deployed the backend using Docker.

PassGuard — Password Manager | Node.js · Express · MongoDB · React.js · Vercel

Repo: github.com/rajidansari/pass-guard · Live: passguard0.vercel.app

◦ Built a full-stack password manager using AES encryption before storing credentials in MongoDB, preventing plaintext password storage.

◦ Implemented authentication with bcrypt password hashing and JWT-based session management.

◦ Developed a responsive React + Vite frontend with Tailwind CSS for creating, reading, and managing encrypted password entries.

Education

Bachelor of Computer Applications (Online) | Manipal University Jaipur

◦ Expected Graduation: 2027

◦ Relevant Coursework: Computer Fundamentals, Programming in C, Fundamentals of Mathematics, Web Programming.
